#### 1. Narrative description of the Prop 28 arts education program(s) funded. (2500 character limit).

With the support of Prop 28 funding, our high school's photography class has undergone a significant upgrade in equipment. The funds were utilized to purchase state-of-the-art camera gear, including digital SLR cameras, lenses, and memory cards. This new gear has enabled students to explore advanced photographic techniques and develop their creative skills in a hands-on environment. The enhancement of our photography program aligns with our goal to provide students with cutting-edge educational tools that prepare them for future careers in visual arts and media. In preparation for our Western Association of Schools and Colleges (WASC) accreditation audit, Prop 28 funding was allocated to ensure we meet the high standards required for a successful review. This included investing in comprehensive training for our staff and updating our educational materials to reflect current best practices. Additionally, we used the funds to ensure that WASC was provided accommodations for their staff evaluations. These measures not only support the audit process but also enhance our overall educational quality and accountability. Recognizing the critical role of school Learning Directors in student success, Prop 28 funding was used to upgrade the technology in our counseling department. A New laptop and software were provided to our counselor, enabling her to better manage student records, track academic progress, and facilitate virtual counseling sessions. This technology upgrade has streamlined administrative processes and improved the accessibility and efficiency of our counseling services, ensuring that every student receives the support they need for their academic and personal development.
